

A **heartfelt** gift

in loving memory

in support of

Heart
Research
Australia

Heart disease affects more than 4 million Australians and is the leading single cause of death.

Heart Research Australia supports world-class and emerging researchers to conduct ground-breaking research into the prevention, diagnosis and treatment of heart disease.

Saying goodbye is never easy, but choosing to honour the life of someone special to you can be a positive and lasting way of celebrating a life, while helping to fund heart research that can save thousands more.

Your generosity will help us in our goal to reduce the devastating impact heart disease has on families and the community.

Keeping families **together** for longer.
